

# Extend your classrooms with a high-impact tutoring program.

**Kelly** Education

**As education recruiting experts,** Kelly® Education helps teachers extend their classrooms by delivering high-impact tutors who provide high-dosage, scaffolded support for K-12 students. Whether your goal is course recovery, learning acceleration, or preparation for next grade levels, our culturally competent, supportive, quality tutors produce transformative academic interventions for your learners.

## **Our Tutoring Solutions team will:**

- Plan and launch your tutoring program in four to six weeks.
- Recruit, vet, and train high-quality tutors.
- Provide coaching and ongoing professional development on best practices and high-impact tutoring strategies.
- Offer in-person tutoring in small groups and/or one-on-one during the school day (integrated push-in or pull-out delivery models) and/or before or after school—and throughout the summer.

- Support multilingual and specialized student needs.
- Use your ready-to-go curricular materials for scaffolded sessions aligned to district curriculum.
- Furnish data and insights on student progress and participation in addition to tutor performance.

Working together this school year, we can positively impact the motivation, confidence, and academic outcomes of your students.
